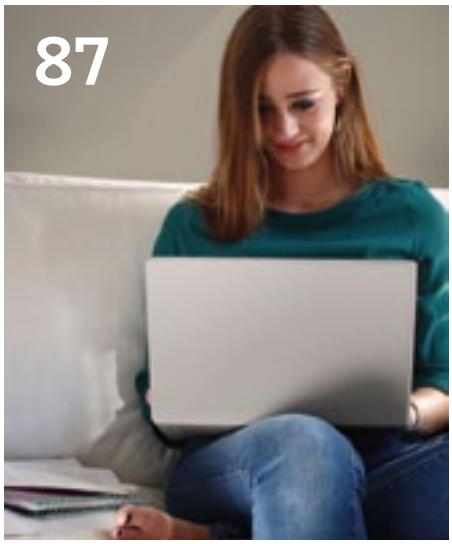
KPN is a leading supplier of telecommunications and ICT services. We offer consumers total solutions for fixed and mobile telephony, internet and TV. For business customers – from multinationals to SMEs and home offices – we provide fixed and mobile telephony and data services. In addition, we provide a broad range of ICT products and services, such as workspace management, data centers, consulting and cloud services. In the Belgian and German mobile markets, we are a strong challenger.


We aim to be the best service provider in the Netherlands. Thanks to us, our customers can be online wherever and whenever: at home, at work and on the move. Our products and services make this as easy as possible for them. Thanks to our cables, transmission masts and data centers and the thousands of KPN people, Schiphol Airport, the port of Rotterdam, the railways, internet banking, pin payments and many other things can all function. Day in, day out. We want to bring the society further, with each other and for each other, in a sustainable way. That's where our strength lies.
