Thank you for choosing KPN E160 HSDPA USB-Modem.

With the KPN E160 HSDPA USB-Modem, you can access the Internet through mobile networks at a high speed.

Note: This manual briefs the profile of the KPN E160 HSDPA USB-Modem, and the preparation, installation and un-installation process. For the operation of the management program (KPN Mobile Connect Dashboard), see the appropriate User Manual.

What Is in Your Packet

The package of your KPN E160 HSDPA USB-Modem contains the following items:

- One KPN E160 HSDPA USB-Modem
- One USB-cable
- A Quick-start manual, printed on the inside of the box

Getting to Know Your KPN E160 HSDPA USB-Modem

The following figure shows the appearance of the KPN E160 HSDPA USB-Modem. It is only for your reference. The actual product may differ.

1 USB Interface

It connects the KPN E160 HSDPA USB-Modem to a computer. USB 1.0 and USB 2.0 are both supported.

2 SIM/USIM Card Slot

It is where you insert the subscriber identity module/UMTS subscriber identity module (SIM/USIM) card.

3 Micro-SD Card Slot

It is where you insert the Micro Secure Digital Memory (Micro-SD) card

4 External Antenna Jack

To this connector an (optional) external antenna can be connected to the KPN E160 HSDPA USB-Modem. (The external antenna is an optional accessory).

5 Strap Hole

It could connect your KPN E160 HSDPA-Modem to, for example, a key cord.

6 Indicator LED

This multi-color-LED indicates the current status of the KPN E160 HSDPA USB-Modem, according to the table below here.

LED indication	Meaning; status of the USB-Modem
Off	The USB-Modem is switched OFF, or problem with the USB-port of the PC
Green 2x blinking	USB-Modem is ON, wait for action
Green 1x blinking	Attached to GPRS or EDGE network, standby
Green Burning permanent	Connection active via GPRS of EDGE network
Dark Blue blinking	Attached to UMTS or HSDPA network, standby
Dark Blue Burning permanent	Connection active via UMTS network
Light Blue (Cyan) Burning permanent	Connection active via HSDPA network

Preparation

Requirements for the Computer

To use the KPN E160 HSDPA USB-Modem, the computer should meet the following requirements:

- USB Type A Receptacle, Compatible with USB 2.0 High Speed.
- Operating System: Windows 2000 SP4, Windows XP SP2, Windows Vista.
- Apple Macintosh OS X 10.4 and 10.5 are also supported, but a separate Mac client needs to be downloaded from <http://www.kpn.com> website.
- Your computer's hardware system should meet or exceed the recommended system requirements for the installed version of OS.
- Resolution for the display: 800 × 600 or higher.

Getting Your KPN E160 HSDPA USB-Modem Ready

- Remove the cover from the USB-connector
- Remove the USIM/SIM card-holder from the KPN E160 HSDPA USB-Modem.
- Insert the USIM/SIM card into the card slot holder, according to the drawing.
- Insert the card slot holder back into the KPN E160 HSDPA USB-Modem.

Inserting the Micro-SD Memory-card (Optional)

Insert the Micro-SD card into the KPN E160 HSDPA USB-Modem, as shown in the following figure.

Note: Do not remove the Micro-SD card when it is being used. Removing the card during an operation may damage the Micro-SD card as well as the device, and data stored on the card may be corrupted.

Installation/Removal Guide

On different operating systems (OS's), the installation and removal procedures may differ. Follow the system prompts during operation.

Connecting the KPN E160 HSDPA USB-Modem with a Computer

Note: First, start up the computer. Then connect the KPN E160 HSDPA USB-Modem with the computer. Otherwise, the KPN E160 HSDPA USB-Modem cannot be installed correctly.

- Plug the KPN E160 HSDPA USB-Modem into the USB interface of the laptop or desktop computer.

- You can connect the KPN E160 HSDPA USB-Modem to a laptop or desktop computer using the USB cable for better signals.

- The OS automatically detects and recognizes new hardware and starts the installation wizard.
- Follow the prompts of the installation wizard.
- After the program is installed, a shortcut icon for the KPN E160 HSDPA USB-Modem management program (KPN Mobile Connect Dashboard) is displayed on the desktop.

Starting the “KPN Mobile Connect” Management Program

After the KPN E160 HSDPA USB-Modem is installed, the KPN Mobile Connect management program is launched automatically. Then every time the KPN E160 HSDPA USB-Modem is connected to the PC, the management program is launched automatically.

You can also double-click the shortcut icon on the desktop to launch the management program.

Removing the KPN E160 HSDPA USB-Modem

- First close down the “KPN Mobile Connect” software management program (dashboard)
- Double-click on  in the Windows Task-bar. The wizard “Safely remove Hardware” appears.
- Select and stop the hardware that refers to the KPN E160 HSDPA USB-Modem.
- When the message: “Hardware can be safely removed” appears, the KPN E160 HSDPA USB-Modem can be removed from the system.

Removing the “KPN Mobile Connect” Management Program

- Click [Start Menu](#).
- Click [Control Panel](#).
- Click [Add/Remove Program](#) to remove the management program of the KPN E160 HSDPA USB-Modem.

Note: Before removing the management program, close down the management program, and remove the USB-Modem from the computer.

Safety Information

Read the safety information carefully to ensure the correct and safe use of your wireless device.

Interference

Do not use your wireless device if using the device is prohibited or when it cause danger or interference with electric devices.

Medical Device

- Do not use your wireless device and follow the rules and regulations set forth by the hospitals and health care facilities.
- Some wireless devices may affect the performance of the hearing aids. For any such problems, consult your service provider.
- If you are using an electronic medical device, consult the doctor or device manufacturer to confirm whether the radio wave affects the operation of this device.

Area with Inflammables and Explosives

To prevent explosions and fires in areas that are stored with inflammable and explosive devices, do not use your wireless device and observe the rules. Areas stored with inflammables and explosives include but are not limited to the following:

- Gas station
- Fuel depot (such as the bunk below the deck of a ship)
- Container/Vehicle for storing or transporting fuels or chemical products
- Area where the air contains chemical substances and particles (such as granule, dust, or metal powder)
- Area indicated with the “Explosives” sign
- Area indicated with the “Power off bi-direction wireless equipment” sign
- Area where you are generally suggested to stop the engine of a vehicle

Traffic Security

- Observe local laws and regulations while using the wireless device. To prevent accidents, do not use your wireless device while driving.
- RF signals may affect electronic systems of motor vehicles. For more information, consult the vehicle manufacturer.
- In a motor vehicle, do not place the wireless device over the air bag or in the air bag deployment area. Otherwise, the wireless device may hurt you owing to the strong force when the air bag inflates.
- Observe the rules and regulations of airline companies. When boarding, switch off your wireless device. Otherwise, the radio signal of the wireless device may interfere with the plane control signals.

Safety of Children

Do not allow children to use the wireless device without guidance. Small and sharp components of the wireless device may cause danger to children or cause suffocation if children swallow the components.

Environment Protection

Observe the local regulations regarding the disposal of your packaging materials, used wireless device and accessories, and promote their recycling.

WEEE Approval

The wireless device is in compliance with the essential requirements and other relevant provisions of the Waste Electrical and Electronic Equipment Directive 2002/96/EC (WEEE Directive).

RoHS Approval

The wireless device is in compliance with the restriction of the use of certain hazardous substances in electrical and electronic equipment Directive 2002/95/EC (RoHS Directive).

Laws and Regulations Observance

Observe laws and regulations when using your wireless device. Respect the privacy and legal rights of the others.

Care and Maintenance

It is normal that your wireless device gets hot when you use or charge it. Before you clean or maintain the wireless device, stop all applications and disconnect the wireless device from your PC.

- Use your wireless device and accessories with care and in clean environment. Keep the wireless device from a fire or a lit cigarette.
- Protect your wireless device and accessories from water and vapor and keep them dry.
- Do not drop, throw or bend your wireless device.
- Clean your wireless device with a piece of damp and soft antistatic cloth. Do not use any chemical agents (such as alcohol and benzene), chemical detergent, or powder to clean it.
- Do not leave your wireless device and accessories in a place with a considerably low or high temperature.
- Use only accessories of the wireless device approved by the manufacture. Contact the authorized service center for any abnormality of the wireless device or accessories.
- Do not dismantle the wireless device or accessories. Otherwise, the wireless device and accessories are not covered by the warranty.

Emergency Call

This wireless device functions through receiving and transmitting radio signals. Therefore, the connection cannot be guaranteed in all conditions. In an emergency, you should not rely solely on the wireless device for essential communications.

Specific Absorption Rate (SAR)

Your wireless device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for wireless devices is 2.0 W/kg and the highest SAR value for this device when tested complied with this limit.

Body Worn Operation

Important safety information regarding radiofrequency radiation (RF) exposure

To ensure compliance with RF exposure guidelines the device must be used with a minimum of 1.5 cm separation from the body.

Failure to observe these instructions could result in your RF exposure exceeding the relevant guideline limits.

Regulatory Information

The following approvals and notices apply in specific regions as noted.

CE Approval (European Union)

The wireless device is approved to be used in the member states of the EU. The wireless device is in compliance with the essential requirements and other relevant provisions of the Radio and Telecommunications Terminal Equipment Directive 1999/5/EC (R&TTE Directive).

Federal Communications Commission Notice (United States): Before a wireless device model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure.

The SAR limit adopted by the USA and Canada is 1.6 watts/kilogram (W/kg) averaged over one gram of tissue. The highest SAR value reported to the FCC for this device type was compliant with this limit.

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

* This device should be installed and operated with a minimum distance of 20 cm between the radiator and your body when using it via USB cable.
